BIOMEDICAL HEMODYNAMIC ANALYSIS REPORT

=====

Report ID: PAT-0004

Patient Name: Mutaafa

Age: 19 years

Date & Time: 2026-07-01 18:06:38

PATIENT VITAL SIGNS:

? Heart Rate: 55 BPM (LOW)

? Systolic Blood Pressure: 300 mmHg

? Diastolic Blood Pressure: 23 mmHg

CALCULATED HEMODYNAMIC PARAMETERS:

? Mean Arterial Pressure (MAP): 115.33 mmHg (HIGH)

? Shock Index (SI): 0.18 (LOW)

? Pulse Pressure: 277 mmHg

? Rate Pressure Product (RPP): 16500

CLINICAL INTERPRETATION:

? Heart Rate: Bradycardia: Heart rate 55 BPM is below normal range (60-100 BPM)

? Blood Pressure: Hypotension: BP 300/23 mmHg is below normal range

? MAP Status: High MAP: 115.33 mmHg - Increased cardiac workload

? Shock Risk: Low shock index: 0.18 - Hemodynamically stable

OVERALL STATUS: ABNORMAL

CLINICAL ALERT: ?? Abnormal Parameters Detected - Medical Review Recommended
